

Joint International Conference on ICMAP 2020 & ISFM 2020

August 16-20, 2020 / August 16-19, 2020
PHOENIX JEJU Hotel & Resort, Jeju Island, Korea

Prof. Ihn Han

Plasma Bioscience Research Center of Kwangwoon University,
Republic of Korea

Prof. Han received her doctoral degree from Kyung Hee University Korean Medicine, south Korea for her work of cancer prevention drug development. Her major is Cell biology and stem cell engineering. Her research project is mainly oriented towards plasma biomedical applications and plasma treated liquids.

Moreover, since 2015 she was focused on the project “Functional regeneration of stem cells by plasma therapy” at PRRC/APMC in Kwangwoon University and then her works was supported by Basic Science Research Program of Korea(NRF) funded by the Ministry of Science, ICT and Future Planning since 2015, framework of international cooperation program by NRF since 2018, by Ministry of ICT since 2019, Basic Science Research Program funded by the Ministry of Education since 2020.

Since 2016, she was winner of the “Young Scientist Award”, “Best Presentation Award” and “Best Poster Award” from various international conference and she has presented the plasma outcomes as “invited speakers” at the International Conference including ICPM, ISPB, IWPCT and also ICMAP
